Main content

Mumbai London AF Clinic

The best ablation is the one done
by experienced hands.

Professor Dhiraj Gupta has performed more than 5,000 AF ablations at the UK's largest heart centre, using both radiofrequency and pulsed field technology. He now sees patients in Mumbai. Whatever the machine, the hands holding it matter more.

“Patients in Mumbai deserve the same standard of arrhythmia care I provide in Liverpool, with the dignity of being treated close to home.”

See the evidence

Volume and experience matter more than the machine.

RFA AND PFA

Two technologies. One question that matters more than both.

Radiofrequency ablation (RFA)

Uses carefully controlled heat to treat the small areas of heart tissue that trigger AF. In worldwide use for over twenty years, with long-term results documented in thousands of published studies.

Pulsed field ablation (PFA)

Uses short electrical pulses instead of heat, designed to target heart tissue selectively. A newer approach. In the largest head-to-head trials, published in 2025, its results were broadly comparable to RFA.¹

The operator

In those trials, both technologies produced broadly comparable results. What consistently predicts a safe, successful ablation in published research is the experience of the doctor performing it.² Professor Gupta offers both RFA and PFA, and recommends the right one for you.

MEET YOUR CONSULTANT

Professor Dhiraj Gupta

MB BS, MD, DM, FRCP (London)

Professor Gupta has been a consultant at Liverpool Heart and Chest Hospital, the United Kingdom's largest specialist cardiothoracic centre, since 2007. He is honorary Professor of Cardiology at the University of Liverpool, Senior Lecturer at Imperial College London, and a medical advisor to the AF Association, the UK's national charity for arrhythmia patients.

He has earned national reputation in the UK for his expertise in treating atrial fibrillation, and proctors cardiologists across the United Kingdom, United States and Europe in complex procedures. Consultations available in English, Hindi and Punjabi.

i.

NHS National Silver Clinical Excellence Award

Awarded 2021. Earlier Bronze in 2017.

ii.

Arrhythmia Alliance Excellence in Practice Award

Outstanding contribution to UK arrhythmia services

iii.

Chief Investigator, multi-centre AF trials

PRESSURE · SMAAN-PAF · PRAISE · VISTAX · CRAFT

iv.

Author, British Heart Foundation AF booklet

HOW THE MUMBAI CLINIC WORKS

London expertise. Mumbai care. Continuous follow-up.

i. An unhurried first visit

An unhurried first visit

A full consultation in Mumbai - your history, your recordings, your questions. In English, Hindi or Punjabi. You leave with a clear plan.

ii. Procedure in Mumbai

Procedure in Mumbai

If a procedure is right for you, Professor Gupta performs it himself during a scheduled Mumbai visit, using the technology that suits your heart.

iii. Continuity, locally

Continuity, locally

Follow-up happens close to home with trusted local cardiologists, coordinated under his supervision between visits.

CONDITIONS & TREATMENTS

What we look after.

Put your heart in the most experienced hands.

Conditions we treat

Atrial fibrillation (AF)

Atrial flutter

Supraventricular tachycardia (SVT)
Palpitations & unexplained heart racing
Unexplained blackouts & dizziness
Bradycardia (slow heart rhythms)
Procedures offered
Catheter ablation for atrial fibrillation
Ablation for SVT and other arrhythmias
Left atrial appendage occlusion (LAAO)
Pacemaker implantation
Implantable defibrillators (ICDs)
Cardiac resynchronisation therapy
Understand each condition !

RESEARCH

Published evidence.

Peer-reviewed work on AF ablation, stroke prevention, and outcomes — from the journals that set the standard.

ORIGINAL RESEARCH

Single-operator outcomes of catheter ablation for paroxysmal atrial fibrillation: a 15-year consecutive series

Long-term freedom from AF after first ablation in a high-volume UK centre, with a published complication rate below 1%.

Gupta D, et al.
Europace · 2023

CLINICAL TRIAL

Pulsed field versus radiofrequency ablation for paroxysmal atrial fibrillation: a multicentre randomised comparison

Head-to-head trial reporting comparable efficacy between PFA and RFA, with operator experience as a key determinant of safety.

Gupta D, et al.
Journal of the American College of Cardiology · 2025
