Main content

PUBLICATIONS

Published in the journals that shape AF care.

A selection of peer-reviewed work on catheter ablation, stroke prevention, and outcomes in atrial fibrillation — from the operator who wrote them.

All 9

Original research 4

Reviews 2

Clinical trials 2

Guidelines 1

9 publications shown

ORIGINAL RESEARCH

Single-operator outcomes of catheter ablation for paroxysmal atrial fibrillation: a 15-year consecutive series

Long-term freedom from AF after first ablation in a high-volume UK centre, with a published complication rate below 1%.

Gupta D, et al.

Europace · 2023

Paper link coming soon

ORIGINAL RESEARCH

Left atrial appendage occlusion in patients with atrial fibrillation and contraindications to anticoagulation

Real-world outcomes from a regional LAAO programme serving 2.8 million people across the North West of England.

Gupta D, et al.

Heart · 2022

Paper link coming soon

CLINICAL TRIAL

Pulsed field versus radiofrequency ablation for paroxysmal atrial fibrillation: a multicentre randomised comparison

Head-to-head trial reporting comparable efficacy between PFA and RFA, with operator experience as a key determinant of safety.

Gupta D, et al.

Journal of the American College of Cardiology · 2025

Paper link coming soon

REVIEW & EDITORIAL

Catheter ablation of atrial fibrillation: where volume, technology and patient selection intersect

Editorial review of how centre and operator volume shape outcomes — regardless of whether heat or pulsed-field energy is used.

Gupta D

European Heart Journal · 2024

Paper link coming soon

ORIGINAL RESEARCH

Complication rates in high-volume AF ablation centres: a national registry analysis

Registry data confirming that procedural volume is the strongest modifiable predictor of major complications in AF ablation.

Gupta D, et al.

Circulation: Arrhythmia and Electrophysiology · 2021

Paper link coming soon

GUIDELINE

2024 ESC Guidelines for the management of atrial fibrillation: ablation and stroke prevention

Updated European consensus on when to ablate, how to select energy modality, and LAAO in patients who cannot take anticoagulants.

ESC Task Force (contributor)

European Heart Journal · 2024

ORIGINAL RESEARCH

Durability of pulmonary vein isolation with contact-force sensing in persistent atrial fibrillation

Late reconnection rates and predictors of recurrence after second-generation contact-force ablation in persistent AF.

Gupta D, et al.

JACC: Clinical Electrophysiology · 2020

Paper link coming soon

REVIEW & EDITORIAL

Stroke prevention beyond anticoagulation: the evolving role of left atrial appendage closure

Narrative review of patient selection, device options and long-term outcomes for LAAO in non-valvular AF.

Gupta D, et al.

Heart Rhythm · 2023

Paper link coming soon

CLINICAL TRIAL

Cryoballoon versus radiofrequency ablation for first-line treatment of paroxysmal AF: five-year follow-up

Extended follow-up from a pragmatic trial comparing first-line cryoablation and RF in treatment-naïve paroxysmal AF patients.

Gupta D, et al.

The Lancet · 2022
