Tel: 011-2659 3322

Dear Dhiraj,

I wanted to thank you profusely for the case of complex atrial fibrillation ablation that you kindly performed in our department at the All India Institute of Medical Sciences, New Delhi on 8 February 2025. This was a complex case on a number of fronts, including his history of prior heart surgery and other comorbidities, but your skill and expertise made it a great success.

I am delighted to report that the patient has remained entirely free of atrial fibrillation for over a year now since his ablation procedure, and his quality of life has improved hugely as a consequence.

It was a fruitful academic exercise, especially for our DM students who got a valuable insight into your workflow and practice, allowing us to visualise the teachings from your numerous research publications in this field which we intend to adopt in our practice as well.

Many thanks also for the inspirational lecture that you kindly delivered for the department covering recent advances in management of atrial fibrillation. This rapidly developing field has benefited from your notable research contributions over the years, and we are grateful for your willingness and enthusiasm to advance AF ablation in India.

We look forward to more opportunities for you to visit our department, and for us to do cases together.

Kind regards,

Nitish Naik
