**Prof Dhiraj Gupta**

Consultant Electrophysiologist

Liverpool Heart and Chest Hospital

Liverpool, United Kingdom

**Dear Prof Gupta,**

**Expression of Gratitude — AF Workshop, Deenanath Mangeshkar Hospital, Pune**

It is with deep gratitude and genuine admiration that I write to you following your recent visit to Pune for our **AF Workshop at Deenanath Mangeshkar Hospital & Research Centre** on **6th and 7th April 2026**. Your presence transformed what we had hoped would be an enriching programme into an experience that our team will cherish for a long time to come.

Over the course of two extraordinary days, you performed **four highly complex electrophysiology procedures** that represented the full breadth and frontiers of modern EP practice:

- **Cardioneural Ablation** — targeting the ganglionated plexi for neuro-mediated atrial fibrillation.
- **Incessant Scar VT Ablation** — requiring advanced substrate mapping and meticulous ablation strategy.
- **Redo AF Ablation in a Post-Cryoablation HCM Patient** — a technically demanding re-do in the setting of hypertrophic cardiomyopathy.
- **Complex Atrial Flutter in a Post-Bioprosthetic MVR Patient** — navigating the challenging anatomy of a post mitral valve replacement circuit.

What struck all of us most profoundly was your **unwavering commitment to your patients**. Despite a demanding schedule and multiple professional engagements during your visit, you consistently placed **patient interest above all else**. What makes this all the more laudable is that your commitment was driven entirely by a sense of purpose and professional dedication — **without any monetary consideration whatsoever**. Such selfless devotion to the welfare of patients is rare and deeply inspiring. Your patience at the table, your clarity of decision-

making under pressure, and the care with which you explained every step to the team were a masterclass in both the science and the humanity of medicine.

Beyond the catheter laboratory, your **evening address to a gathering of physicians and cardiologists** was equally compelling. Your lucid presentation of the **latest advances and research in AF ablation** — delivered with the authority of someone who has helped shape the field — was received with tremendous enthusiasm. Many colleagues remarked that it was one of the most informative and thought-provoking talks they had attended, and I have no doubt it will inspire several of them to pursue further training and collaboration in this discipline.

You are, in every sense of the word, a **great ambassador for AF ablation**. Your technical excellence is matched only by your generosity of spirit — the ease with which you share knowledge, mentor colleagues, and give of your time is something that we in Pune have been privileged to witness first-hand. The energy and inspiration you brought to our team will continue to reverberate long after your visit.

On behalf of the entire team at the Electrophysiology Division, Deenanath Mangeshkar Hospital, and all the participants at the workshop, please accept our heartfelt thanks. We are honoured to have hosted you, and we very much hope this is the beginning of a long and fruitful association between our institutions.

We look forward to welcoming you back to Pune.

Yours sincerely,

**Dr Rajesh Dhopeswarkar**
