Dear Dr Dheeraj Gupta,

I sincerely thank you for proctoring us during the atrial fibrillation ablation at our institute on 27 and 28th October 2025. All our colleagues appreciated your dedication and the way you made the procedure appear very simple. We have learned a lot about the nuances of Afib ablation by performing cases with you. The techniques you teach are very useful for resource-limited setups in our country. We have adopted the techniques you taught and found them very useful.

The most important thing we learned is to perform transeptal access under fluoroscopic guidance, avoiding intracardiac echo, which is very important in resource-limited settings. Transeptal access directly with an agilles sheath, bypassing the additional steps of using the SRO sheath and exchange.

The evening symposium on atrial fibrillation ablation covered the evolution of AFib ablation and provided simple, practical tips to increase ablation success and reduce complications, which were very helpful to the participants. **You have done all of this without any monetary benefit whatsoever.** We are eagerly waiting for your next visit to our institute.

Your Sincerely

Dr. SATHISH. S MD, DM
