Consultant Electrophysiologist
Liverpool Heart and Chest Hospital
Liverpool, United Kingdom

Subject: Expression of Gratitude – Your Visit to PGIMER Chandigarh for Atrial Fibrillation Ablation Workshop.

Dear Prof. Gupta,

On behalf of the Electrophysiology Team at PGIMER, Chandigarh, I extend our deepest gratitude for your visit on 25 March 2026. Your demonstration of exceptional expertise in electrophysiology, particularly atrial fibrillation (AF) ablation, was nothing short of inspiring.

It was a landmark day in our catheterization lab, where we successfully performed AF ablations in four patients, including a challenging case of atypical atrial flutter in a patient with prior mitral valve replacement. Commencing at 9:00 AM, we completed all procedures by 4:00 PM with outstanding results. We are delighted to report that all patients are recovering well, with no AF recurrence to date.

Your profound insights into left atrial anatomy, coupled with masterful catheter manipulation techniques, provided an invaluable learning opportunity for me and our cardiology fellows. In a remarkably short time, we gained practical knowledge that will shape our practice for years to come. We are particularly thankful for your introduction to QDOT ablation technology and your willingness to travel from the United Kingdom to share it selflessly without any remuneration exemplifying true dedication to academic electrophysiology and patient care.

You are, in every sense, an exemplary mentor whose passion will inspire generations of electrophysiologists.

The entire EP team joins me in reiterating our profound appreciation. We would be privileged to host you again at your earliest convenience.

Yours sincerely,

Parag Barwad, MD
