

Mumbai London AF Clinic

Outstanding placeholders and map activity inventory

Generated 12 August 2026 from live site data files

1. Contact and clinic details (data/site.ts)

These values appear on the Book page, footer, and enquiry flow. Placeholder text is shown to visitors until replaced.

2. Mumbai visit dates (data/visits.json)

Shown on the Book page under "Upcoming Mumbai visits." Months and exact dates are not yet confirmed.

- August 2026 (Waitlist): Fully booked. Join the waitlist in case of a cancellation.
- 27 Sep to 4 Oct 2026 (Booking open): Consultations and procedures. Filling fast.
- 11 to 17 Nov 2026 (Booking open): Consultations and procedures. Filling fast.
- 15 to 26 Dec 2026 (Booking open): Consultations and procedures. Filling fast.
- Homepage floating pill (components/FloatingBookingPill.tsx): hardcoded "Next Mumbai visit: March 2026 · Booking open" (not wired to visits.json)

3. Journey page photos (data/milestones.ts)

Every milestone carries real media: a photograph, a video, or a gallery carousel. Nothing on the journey page renders a decorative placeholder frame. The 2025 finale is listed last; it sits outside the timeline and is rendered by NightCtaCard, but it carries a photograph too.

- 1988 (Medical school): photo /images/journey/mbbs-convocation-1994.webp
- 1994 (Post graduation): photo /images/journey/dm-aiims-convocation-2000.webp

4. Press articles missing online links (data/links.json)

These articles appear on the Voices page. Print clippings are intentional, but "Read article" links are absent until a URL is added (or the snippet-only treatment is confirmed).

- The Indian Express (27 March 2025): Global heart rhythm expert conducts free training at PGIMER
- The Pioneer (March 2025): UK Heart Rhythm Expert Begins India Tour from Chd, Offers Free Advanced Cardiac Procedures

- Punjab Kesari (March 2025): Global heart expert to give free treatment, train doctors across India

5. Map hospital site links (data/locations.json)

All 83 map locations have an empty "url" field. The map detail card shows a "hospital link needed" flag instead of "Visit hospital site".

- Also outstanding: every location has an empty "images" array (no location photos on the map).

6. Interactive map: countries, cities, and activity

Source: data/locations.json. Activity types: Operated (procedures), Taught (training visits), Proctored (supervised local operators during cases).
